Build Your Workflow

Non IT personnel can build their own business workflow, process or procedure and see it evolve in front of them. Make the Workflow Designer file even more useful by adding as much text as needed to understand any step in the diagram, and automatically synchronise with the chart. Add links to documents, diagrams or training references all from the one interface.

Publish to Workflow connect

One button simple publishing into the secure Workflow Connect Server and employee's staff, vendors customers have instant access to Workflows and procedures including fully formatted reports and access to the document library. Alerts, notices, and access to a range of collaboration tools is instantaneous and easy.

connect People Process Information & Data

Once published make your workflows come alive by linking into a range of business modules designed to take care of all your procedural and compliance needs. All modules are fully integrated and can be added as required and licensed for as few or as many users needed to do the Job.

Why Workflow connect?
